With the ever-changing demands, Times Printers saw the importance of providing packaging solutions to you. We work with a variety of companies to offer a unique breath of capabilities for different industries. Our team is committed to delivering quality assurance, superior customer service and innovative and sustainable packaging solutions that allows your brand to shine.

We understand one carton does not fit all products! With a unique and smart packaging, you will be able to distinguish your product in a crowded market. Times Printers have design experts who will work with you to create specialised folding cartons for a wide variety of product categories and markets. To value-add our services, we would provide suggestions on lowering overall packaging costs and improvement in design. In years to come, we will continue to progressively build and hone our expertise in packaging.

Today, our ISO-certified manufacturing facilities in Singapore leverage on sustainable, environmentally friendly, and leading-edge technologies to produce quality packaging and printed products.

# HELLO, I'M A PAPER ECO-POUCH

BY TIMES PRINTERS

## Eco-pillow Pouch Introduction

3-in-1 coffee can be made instantly, but that plastic coffee powder sachet lasts a lot longer than an instant. That's right - something as small as a sachet can go a long way to saving our environment, or on the flipside, harming it. If only there were a biodegradable alternative to make those morning coffees more guilt-free...

# Eco-pillow Pouch

## *A small choice for a big difference*

Our eco-pillow pouches provide an eco-friendly alternative to plastic sachets, compromising on strength and quality. One small pouch for you, one giant leap for the earth.

### **Sustainable can be strong too**

Strength and durability on par with that of plastic sachets.

### **Heat seal coating**

Prevents moisture and essentially non-tearable.

### **100% eco-friendly**

Manufactured with 100% biodegradable material.

### **Automatically eco-friendly**

100% machine automated sustainable eco-pouch packaging, from start to finish.

### **Goodbye plastic, hello premium.**

When it comes to eco-packaging, we've got everything you could possibly ask for. Our state-of-the-art offset and pouch-making technology ensures a seamless production process from start to finish, fully automated and completed all in-house. With this level of efficiency, we can be your manufacturer for the whole region.

# Kraft Paper Bag

## 100% compostable and biodegradable

Created with responsibly sourced Kraft, FSC paper and birch materials.

### Keeping our forests alive

100% recycled Kraft upholds our conservation efforts, while FSC-certified paper guarantees ethical protection for our forests, with a tree planted for every tree cut.

### Choose local for low cost

Made in Singapore, our Kraft paper bags are high in quality and low in cost, making them the obvious choice across the region.

### Picture perfect prints

While Flexo printing is the industry standard, we've raised the bar with state-of-the-art web-press technology for superior output.

### Automatically eco-friendly

A 100% machine automated process in our Singapore production plant ensures eco-friendly output from start to finish - handles included.

## Kraft Paper Bag Introduction

Regular paper, move aside: Kraft has taken over the world. From takeaway bags to packaging, demand for this simple brown paper has skyrocketed in recent years due to its eco-friendly nature and wide versatility. It's quickly becoming obvious that Kraft paper bags are one of the must-have options to carry out sustainable corporate practices.

# Kraft Paper Bag

## *Carry nature's craftsmanship*

Kraft paper bags are made only with either FSC-certified paper or fully recycled Kraft paper, guaranteeing protection for our forests. But here's why we're a cut above the rest: our state-of-the-art production line is the first in the region to supply premium eco-friendly paper bags at a fraction of the usual cost. Now you can carry quality and sustainability wherever you go.

## *We can craft it*

Kraft paper bags come in all shapes, colours and sizes - we know this well because we can make them all. Our Singapore-based plant houses a stunning range of fully automated machines with the capability to create every kind of Kraft paper bag you could imagine. Whatever you need, we can craft it.

## F&B Consumable Introduction

Simple, convenient and fast: that's what the food delivery sector is famous for. However, single-use plastic takeaway packaging seems to be the easiest way to meet these KPIs, to the detriment of the environment. We need F&B packaging that allows businesses to stay in the green while staying green.

# F&B Consumable

## *Order green to-go*

Our 100% compostable F&B Consumables are the eco-friendly packaging to combat single use plastics. Created from natural resources, they provide a fresh alternative to the massive consumption of styrofoam and plastic packaging currently saturating the industry. It's sustainability you can takeaway.

### Support that sustains

Exclusive partnership with sustainable R&D houses in India, Indonesia and Thailand.

### Phase out plastic

Mitigate the impact of single-use plastics.

### Look, no leaks!

Layered with food-safe and liquid-safe natural plant-based resin to prevent spillage and leaking.

### Dining as nature intended.

Natural is the way to go. Our consumables are made from 100% plant-based materials like sugarcane bagasse and corn starch. Even better, our all-natural resin coating guarantees leak-proof dining, so you never have to deal with bento box or coffee cup spills again.

## Product Eco-Packaging Introduction

Whether you're a massive corporation or a simple start-up, one thing's for certain: every product you sell must be packed in a box. But maybe it's time to look beyond the dime a dozen cardboard or paper packaging, and start searching for a more environmentally friendly alternative.

# Product Eco-Packaging

## *Infinite Possibilities*

A production line like no other. Singapore based printing plant is well equipped with fully automated offset and finishing machines. We can tailor the packaging boxes to your specifications to suit your business needs.

Packaging possibilities range from a food-grade box for your cookies to a beautiful printed box containing your product.

### The whole package deal.

When it comes to eco-packaging, we've got everything you could possibly ask for. Our state-of-the-art offset and finishing technology ensures a seamless production process from start to finish, fully automated and completed all in-house. With this level of efficiency, we can be your manufacturer for the whole region.

#### Packaging to protect the earth

Eco-friendly 100% biodegradable material.

#### Quality, quickly

Efficient machine-automated process from start to finish, guaranteeing smooth production of quality packaging.

#### Colours created to care

Designs created with natural soy-based printing ink.

#### Premium in-house production

100% in-house manufacturing with state-of-the-art offset technology.

# Traditional Printing

For many years, Times Printers' core business has been fulfilling the demand of large quantity time-sensitive prints. As such, we employ the state-of-the-art technology that delivers timely results that are above industry standards for quality. To remain competitive, we progressively bring in new machines to provide the best quality goods to our clients.

Our cost-effective print solutions cover high-quality, quick turnaround time-sensitive weekly and monthly magazines; high quality books and long-run directories; polished marketing collaterals and educational materials such as full-colour textbooks.

All our customers appreciate our seamless pre-press to printing press process that translates to speed, savings, and reliability without compromising on the flexibility to respond to urgent requirements.

Expertly managing & maintaining the wide array of quality equipment is our team of skilled personnel who understand the industry. Our people keep pace with the latest technological breakthroughs so that they can constantly offer innovative solutions and carry out quality control in every stage of production in the entire value chain. Their dedication to their craft makes Times Printers what it is today and will also contribute to what Times Printers will be in future.

Year after year, we have maintained our record of raking up numerous print awards for excellence in printing. Most importantly, for medium to large print-runs, offset and web printing is still the most cost-effective solution.

# Digital Printing

In recent years, the print business landscape has changed drastically. We see a drop in the print quantity and projects tend to be ad-hoc rather than contractual. By offering digital printing solutions, you can now keep your costs low by printing only what is required. Times Printers operate an extensive digital printing operation with dedicated bindery unit to fulfil such demands.

Our innovative digital capabilities and quality customer service empower us to deliver print-on-demand services with quick turnaround for time sensitive printing needs. In addition, our impressive host of services range from digital print-on-demand to e-book application; from variable data printing to scanning and archiving services and more.

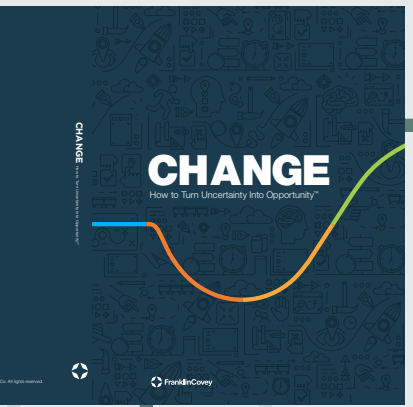

Going beyond digital printing, we also partner our customers to integrate cross media marketing initiatives to execute successful marketing campaigns. In recognition of our quality performance, we have garnered national and international recognition over the years.
